

# DEAR FRIENDS AND BUSINESS PARTNERS,

At the closing of the year we would once again like to take the opportunity to express our continued appreciation for the pleasant and successful collaboration in 2019.

This year we would like to draw your attention to our support of the Macaca Nigra project for the protection of the crested macaque and its habitat in Indonesia. The crested macaque can only be found on the island of Sulawesi, Indonesia. These human-like animals fascinate with their highly developed social behavior that distinguishes them from other species. They are extremely threatened by extinction due to the loss of their rainforest habitat and also by poaching especially since they are considered a delicacy.

The *Primates in Need Association e.V.* supports the protection of the crested macaque with its Macaca Nigra project through preservation of rainforest habitat, research and environmental education.

In 2020 our donation will fund an anti-poaching unit with three game wardens, the training and employment of two young local scientists for the macaque research station in Tangkoko and the educational director of the environmental education and information programme. In addition, our donation will support environmental education classes and school excursions for around 200 children to the macaque region.

For further information, please visit: [macac-nigra.org](http://macac-nigra.org) and [pina-ev.org](http://pina-ev.org)

**WE WISH YOU AND YOUR FAMILY A VERY MERRY CHRISTMAS AND A HAPPY AND SUCCESSFUL NEW YEAR.**
